Summary

Junior developer passionate about building full-stack applications, exploring cybersecurity, and applying machine learning to real-world problems. Skilled in modern web frameworks (MERN, FastAPI, React Native), with hands-on experience in collaborative platforms, financial dashboards, and AI-driven applications. Eager to contribute to innovative teams while continuously learning advanced technologies.

Technical Skills

• Languages: Python, JavaScript, Rust
• Frameworks & Tools: FastAPI, React Native, MERN Stack, Django, Node.js
• Databases: MongoDB, PostgreSQL, MySQL
• Specializations: Cybersecurity, Ethical Hacking, Machine Learning, Data Analytics
• Other: Git/GitHub, REST APIs, Three.js, Docker (basic)

Projects

• **DevConnect** – MERN-based Social-Collaborative Platform with GitHub-style collaboration and developer-focused social feed.
• **QuickCourt** – Full-stack sports booking app with authentication, booking management, and dashboards.
• **Rewear** – Modular React UI clothing browsing and filtering app.
• **Finance Manager Dashboard** – MERN app with financial data visualization, analytics, and export features.
• **AI-Powered YouTube Studio Dashboard** – Django + ML project with Prophet/LSTM, integrated YouTube API analytics.
• **Disease Prediction System** – ML/DL project predicting diseases from symptoms & medical images with web interface.

Education

■ Bachelor's in Computer Science (Ongoing) – Focus: Full Stack Development, Cybersecurity, Machine Learning

Interests

■ Open Source • ■ Cybersecurity • ■ Automotive Tech • ■ AI for Social Impact
